

Wash your hands frequently with soap and water. You should take at least 20 seconds to wash them thoroughly each time you can.

Clean your house thoroughly. Make sure to clean all surfaces that you come into contact with.

Cover your mouth and nose whenever you go out to avoid contact with the virus.

Avoid touching your face constantly. This will reduce the chances of contracting the virus!

CORONAVIRUS PREVENTION TIPS

Stay at home as much as you can

Maintain a healthy routine while being at home. This will keep your immune system strong.

Avoid travelling. Also, stay away from airports, bus stations, subways, and densely populated areas.
