

Adding the numbers

Date _____

Name _____

Find the sum:

1) $10 + 20 =$

9) $90 + 10 =$

17) $13 + 12 =$

2) $10 + 31 =$

10) $3 + 9 =$

18) $38 + 16 =$

3) $10 + 3 =$

11) $12 + 35 =$

19) $49 + 21 =$

4) $11 + 11 =$

12) $18 + 37 =$

20) $80 + 12 =$

5) $20 + 20 =$

13) $62 + 19 =$

21) $5 + 89 =$

6) $32 + 18 =$

14) $100 + 10 =$

22) $9 + 8 =$

7) $12 + 31 =$

15) $90 + 20 =$

23) $23 + 4 =$

8) $15 + 32 =$

16) $54 + 32 =$

24) $100 + 58 =$

Word math problems!

1) Tony has some marbles. Jack doesn't have marbles, so Tony decides that, for them to play together, he has to share his marbles with Jack. Tony gave Jack 6 marbles and saved 6 for himself. How many marbles did Tony have before sharing?

2) Breakfast is ready. Mom asks Tony to put one plate for each member of the family. Tony has two brothers, mom, dad, and himself, and they're all eating together at the table. How many plates will Tony need?

3) The teacher has 10 kids in her classroom, but 15 more kids are on their way to school. How many kids will there be when all of them are in the classroom?
