

Dosage Conversion Chart

Lasix to Bumex

Clinical Scenario	Furosemide (Lasix) Dose	Equivalent Bumetanide (Bumex) Dose	Administration Notes
Mild Edema / Starting Dose	20-40 mg daily	0.5-1 mg daily	Often given as single morning dose
Standard CHF Maintenance	40-80 mg daily	1-2 mg daily	May require BID dosing for 24-hour coverage
Moderate Fluid Overload	80-120 mg daily	2-3 mg daily	Consider split dosing (e.g., 1.5 mg BID)
Severe/Resistant Edema	120-160 mg daily	3-4 mg daily	Typically split BID; monitor electrolytes closely
High-Dose Therapy	160-240 mg daily	4-6 mg daily	Often requires hospitalization for initiation/monitoring
Very High-Dose / Renal Failure	240-500 mg daily	6-12.5 mg daily	Use with extreme caution; hospital setting required
